# Learning, Teaching and Assessment Strategy

A blended learning approach is adopted in delivering this module. This approach combines the use of both:

- (1) online learning and teaching materials and resources; and
- (2) place-based or face-to face learning and teaching experiences (when they are applicable).

The main finance and accounting concepts and theories are introduced in the lectures (Lo 1a, 1b, 2a, 2b, 2c, and 2d). The topics are then reinforced, extended and applied to practical financial or accounting problems in tutorials (Lo 1a, 1b, 2a, 2b, 2c,2d, 3a, 3b, and 3c). The tutorials will also be used to feedback students and module leaders on students' performance and understanding. Oral feedback and further assistance is also given during office hours and through feedback forms. Students are expected to supplement their learning by reading Finance textbook(s) and financial newspapers and web articles (Lo 3c).

The exams and coursework are designed to test students' understanding of fundamental financial concepts, accounting concepts andtheir skills in analysis and problem solving (Lo 1a, 1b, 2a, 2b, 2c, 2d and 3a). The coursework will consist of working in groups of no more than 4 members covering concepts from both finance and accounting to meet LO3a.
